* A. As requested by the Office of Security, Plain Text Processing Equipment (OS/PTPE) Branch, the Office of Logistics, Printing and Photography Division (OL/P&PD) submitted a memorandum detailing the results of an evaluation of several personal copiers as well as two desktop models. The evaluation was conducted to aid OS/PTPE in the selection of copiers

1-5

Discussed in the memorandum were transportability and user maintainability of the copiers. Also addressed was copy quality, machine speed, and special features available with some of the equipment.

B. The Office of Logistics, Printing and Photography Division (OL/P&PD) is nearing completion of its study on ink standardization. The purpose of the study is to determine if the standardization of ink colors Agency wide is in fact feasible. Testing was conducted comparing the overnight statistics of May 1985 with those of May 1986. Analysis of the statistics showed a reduction in press wash-up time. Because the six-color press was introduced in January 1986, the actual reduction could be the direct result of ink standardization and the new press. Further evaluation and periodic testing will be required to provide an accurate analysis. After a review by P&PD's management staff, the findings of the study will be further discussed.

25X1

* C. On Tuesday, 24 June 1986 a representative from the Office of Logistics, Printing and Photography Division (OL/P&PD) met with a representative from the Office of

110
 Information and Technology Management Staff (OIT/MS) to discuss computer generated graphics. The focus of this meeting was to determine how OIT/MS can best generate graphics that are compatible with P&PD's Dicomed System. This meeting gave P&PD an opportunity to describe its activities with regard to the Computer Graphics MBO with a different level of OIT management. This MBO is concerned with the on-line enhancement of Agency-wide, customer-generated computer graphics, and with OIT's cooperation, it should be in operation by December 1986.

no
 * D. A number of priority photographic jobs were processed by the Office of Logistics, Printing and Photography Division (OL/P&PD) during the past week. Included was the production of nine vugraphs for Facilities Management Division, Operations-Design Branch (FMD/OPS-DB) for an OL briefing on space allocation problems. The job, scheduled for 20 hours, was processed in eight hours. A second priority job requiring one hundred 8" X 10" photographs to be printed for the Directorate of Intelligence, Office of Central Reference, Visual Media Branch was processed overnight for a Thursday morning deadline.
